

DOUBLE SPOT DISSIPATER STAINLESS STEEL SDE-22A

APPLICATION:

The Double spot dissipater can be mounted on the metal cap of a D.C. grounded antenna, or horizontal/vertical pipe or structural member. For use wherever streamer delaying or static dissipation is desired. These spot dissipaters are an assembly of two SDE-2 dissipater elements, and have a hardware set to attach the dissipaters which includes a lightweight stainless steel bracket and a stainless steel hose clamp.

AVAILABLE:

SDE-22A 8" x 2-1/2" w/ two 1/4" holes type 316 stainless steel tubing.
