

CANDELABRA FOUR ELEMENT AIR TERMINAL STAINLESS STEEL

APPLICATION:

For use wherever an air terminal (lightning rod) is appropriate and streamer delaying, or static dissipating qualities are desired. These dissipators are used in place of standard air terminals in a structural lightning protection system installed to UL-96A and NFPA 780 specifications. The terminal is mounted to the base most suitable to the structure on which it is being installed.

AVAILABLE:

CDA-0400	Candelabra four-element array
CDA-0418	Candelabra four-element array on 18" stainless post
CDA-0424	Candelabra four-element array on 24" stainless post
