

WINDSOCK AIR TERMINAL ULTRA-SHARP POINT KIT - CLASS III STAINLESS STEEL DAT-1xx-WS

APPLICATION:

UL listed air terminal (lightning rod) with windsock, suitable for use in any UL 96A or NFPA 780 system. Designed for reliable lightning protection in structural systems where windsock functionality is required.

INSTALLATION:

Mount the air terminal on a base suitable for the structure. Ensure compliance with UL 96A and NFPA 780 standards during installation. Consult the LBA Group expert for base compatibility and additional installation instructions.

AVAILABLE:

DAT-148-WS: 48" Class III stainless steel with ultra-sharp point and windsock.

DAT-160-WS: 60" Class III stainless steel with ultra-sharp point and windsock.
