Faraday JACKET Forensic Power Locker

FARADAY
D E F E N S E

The Faraday JACKET Forensic Power Locker is a stainless steel storage and charging system purpose-built for forensic, law enforcement, and high-security environments. It features 7 individually numbered compartments, each with AC and USB outlets, to keep devices powered while securely stored.

Each unit includes 7 JACKET Pro Window Port Faraday Bags, providing >85 dB attenuation (400 MHz–40 GHz) to block cellular, Wi-Fi, Bluetooth®, GPS, and RFID signals. These bags allow devices to remain shielded while charging, with a clear signal-blocking window for monitoring and a filtered USB port for safe connectivity.

By combining rugged locker security with advanced Faraday isolation, the JACKET Power Locker delivers a complete, turnkey solution for protecting and powering digital evidence or sensitive devices.

**All JACKET products are made in the USA.**

Applications

- Forensic evidence storage and charging
- Law enforcement and intelligence operations
- Military and secure communications facilities
- Corporate IT security and breach response
- Secure laboratories, universities, and shared workspaces

Material & Construction

- **Frame & Body:** Stainless steel
- **Compartments:** 7 individually numbered units, each with AC & USB outlets
- **Locking System:** Keyed locks with 7 individual keys + 1 universal override key
- **Ventilation:** Side vents for airflow and device cooling
- **Finish:** Professional flush-mount design for wall integration
- **Key Storage:** Top-mounted drawer for secure key management

Performance

- **Attenuation (Bags):** >85 dB (400 MHz–40 GHz)
- **Blocked Signals:** Cellular (2G–5G), Wi-Fi (2.4 & 5 GHz), Bluetooth®, GPS/GNSS, RFID
- **Security:** Individually locked compartments with override key
- **Safety:** Side ventilation prevents overheating during charging

Specifications – Locker

- **SKU:** 14058
- **External Dimensions:** 16.5″ W × 39″ H × 17.75″ D
- **Compartments:** 7 lockable units with integrated AC & USB outlets
- **Accessories Included:**
  - 7 JACKET Pro Window Port Faraday Bags with charging cables
  - 7 individual locker keys + 1 universal override key
  - Power cord & indicator light
  - Top key storage drawer
- **Installation:** Flush-mount wall integration
- **Warranty:** One-year limited
- **Made in:** USA

Specifications – Faraday Bags (7 included)

- **Dimensions:** 16″ × 10.5″
- **Shielding Effectiveness:** >85 dB attenuation (400 MHz–40 GHz)
- **Material:** Triple-layer CYBER NC Nickel/Copper Faraday fabric with rugged CORDURA® outer shell
- **Window:** Transparent, signal-blocking window for monitoring device status
- **Ports:** Built-in filtered USB charging port with external cable lock
- **Included Cables:**
  - 1 USB-to-USB cable; 1 USB-to-Type C, Lightning, and Micro USB combo cable

Options & Accessories

- Additional JACKET Pro Faraday Bags
- Replacement cables and keys
- Extended warranty and service plans
