

UNIVERSAL SWIVEL AIR TERMINAL BASE

APPLICATION:

Universal swivel air terminal bases designed for use with lightning protection air terminals. The swivel adapter allows the air terminal to remain plumb and level under most installation conditions. These bases are intended for installation on flat surfaces and support both horizontal and vertical mounting orientations. Compatible with a variety of attachment methods including self-tapping screws, nails, and adhesives. Available in aluminum, copper, tinned copper, and stainless steel bimetallic-rated configurations for use in standard and corrosive environments. The stainless-steel version may also be used as a bimetal connector or transition component.

AVAILABLE:

FAB-SWIVEL-3/8-C - 3/8" threaded copper universal swivel air terminal base.

FAB-SWIVEL-1/2-A - 1/2" threaded aluminum universal swivel air terminal base.

FAB-SWIVEL-1/2-C - 1/2" threaded copper universal swivel air terminal base.

FAB-SWIVEL-TC - 1/2" threaded tinned copper universal swivel air terminal base.

FAB-SWIVEL-SS-L - 1/2" threaded stainless steel bimetallic-rated universal swivel air terminal base.

FAB-SWIVEL-5/8-A - 5/8" threaded aluminum universal swivel air terminal base.
